CURRICULUM VITAE ET STUDIORUM
Prof MASSIMILIANO AGOSTINI

PERSONAL DATA
Family name AGOSTINI Massimiliano
Date of birth 20 January 1972
Place of birth Terni, Italy
Citizenship Italian
Address Dept. Experimental Medicine
University of Rome "Tor Vergata"
via Montpellier, 1
00133 Roma, Italy

ORCID identifier 0000-0003-3124-2072
Public record http://orcid.org/0000-0003-3124-2072
Scopus Author ID: 7005322176
Researcher ID: G-9579-2014 http://www.researcherid.com/rid/G-9579-2014

PRESENT POSITION
Associate Professor, Molecular Biology, University of Rome "Tor Vergata", Italy

EDUCATION
1997 Degree in Chemical and Pharmaceutical Technology
1998 Pharmacist license, state of Italy
2006 PhD in Clinical and Experimental Pharmacology

CAREER HISTORY
1997-1999 Visiting Fellow Section of Pharmacology, School of Medicine, University of Perugia
1999-2001 Fellowship Section of Pharmacology, School of Medicine, University of Perugia
2005-2006 Research Assistant Section of Pharmacology, School of Medicine, University of Perugia
2006-2007 Research Assistant Section of Pharmacology, School of Medicine, University of Perugia
2007-2011 Career Development Fellow, MRC Toxicology Unit, UK
2014-2014 Visiting Scientist, at The Campbell Family Institute for Breast Cancer Research, Toronto, Canada
2011-2014 Senior Investigator, MRC Toxicology Unit, UK
2014 to 2019 Visiting Scientist, MRC Toxicology Unit, Cambridge University, UK

MEMBERSHIP
2002 Italian Society of Pharmacology

TEACHING ACTIVITIES

2015-Present Metabolomics and Transcriptomics II level Master, Personalized Nutrition: Molecular and Genetic bases, University of Rome Tor Vergata

2016-Present Cancer Metabolism I level Master, Nutrition and Cosmesis, University of Rome Tor Vergata

2016-2020 Biochemistry and Molecular Biology International Medical School University of Rome Tor Vergata

2017-2020 Molecular Biology Medicine and Surgery, University of Rome Tor Vergata

2017-Present Molecular Biology Residency in Infection Disease University of Rome Tor Vergata, Italy

2019-Present Molecular Biology Residency in Endocrinology and Metabolic Diseases Virology University of Rome Tor Vergata

2019-Present Molecular Biology Residency in Microbiology and Virology University of Rome Tor Vergata

2020 Biochemistry School of Pharmacy University of Rome Tor Vergata

2020 Molecular Biology International Medical School University of Rome Tor Vergata

EDITORIAL ACTIVITY

Receiving Editor *Cell Death & Disease*

Editorial board of *Molecular & Cellular Oncology*

Editorial board as Review Editor of *Frontiers in Cancer Molecular Targets and Therapeutics*

Ad hoc Referee:

Cell Death & Disease, Cell Death and Differentiation, Frontiers in Cancer, Molecular and Cellular Oncology, Molecular Neurobiology, Oncogene, Oncotarget, Cell Cycle, FEBS Journal, Scientific Reports, Journal of Cellular Biochemestry, Molecular Oncology, FASEB Journal, Journal of Human Genetics, Biology Direct

RESEARCH INTEREST

MA is mainly interested in the characterization of transgenic mice with genetic alterations in the p53 family genes and their targets to understand their effect on development and cancer. In particular, he aims to investigate the role of the transcription factor ZNF750 (transcriptionally regulated by p63) in tumorogenesis by using combing *in vitro* and *in vivo* models combined with system biology (transcriptomics, proteomics and metabolomics). Currently, MA is mainly involved on:

1) Dissecting *in-vivo* functions of specific p53-family gene isoforms in tumorigenesis.

2) Investigate the role of ZNF750 in cancer, focusing on breast and lung cancer.

3) To identify *in-vivo* functions of ZNF750 in development, physiology and tumorigenesis by using genetically modified animals.
